RELEVANT EXPERIENCE

Oct 2022 - Now

Full Stack Developer @ Fincons Group AG – Project exclusively at SBB CFF FFS // Bern, CH

- Contributed to a landmark IT project: the successful decommissioning of SBB's 60-year-old mainframe system
- Develop critical microservice applications for railway operations using Angular, Java 21, MongoDB, Apache Kafka, Docker
- Implement scalable solutions on Kubernetes/OpenShift, ensuring seamless transition from legacy systems
- Work in a SAFe-organized team, delivering high-impact software for transportation organizations and locomotive engineers

Dec 2021 - Sept 2022

Software Developer @ ACTICO GmbH // Immenstaad, GER

Collaborated in a Scrum-based team to develop and enhance Spring-based REST microservices. These services were used to host, deploy, and execute rule-based machine learning decision models. Applied Python, Angular, Java, Docker, TypeScript etc.

Oct 2016 - Dec 2020

- Software Developer @ SAP SE // Walldorf, GER
- Worked with an international Scrum team on establishing and extending Event Mesh, formerly known as Enterprise Messaging
- Developed and onboarded horizontally and vertically scalable REST-based applications in multiple geo-locations
- Performed regular software update releases, complied with security standards by providing patches and fixing vulnerabilities
- Worked with various technologies such as Java, Shell, RabbitMQ, PubSub+ Event Broker, Cloud Foundry, AWS, etc.
- Coordinated a project with an international partner for reliable cross-broker message migration bearing critical customer data
- Managed and resolved emergency events such as outages to reestablish critical applications that handle serious data
- Implemented customer data metering, which laid the foundation for accounting, monitoring, and product commercialization
- Realized a statistics data exporter application in Go by eliciting broker data. Fed a Prometheus instance and visualized the data in Grafana dashboards. Pushed Alerts to Slack, which raised the reaction time and significantly improved customer experience

Sept 2013 - Dec 2013

Student Assistant @ University of Mannheim // Mannheim, GER

- Assistance in lecture preparation and refactoring for "Foundations of Information Systems"
- Scientific literature analysis, evaluation upon interdependence between independent, dependent, and control variables

FDUCATION / PROJECTS

Jan 2020 - Now

Coursera / Private Endeavors // coursera.org, DeepLearning.Al

- Always exploring new technologies and trends in IT
- Completed the specialization track for <u>Deep Learning</u>. Completed [0], [1], [2], [3], [4], [5]
- I have completed the <u>Machine Learning</u> track [6] and the <u>Crash Course on Python</u> from Google [7]
- I am developing my personal Website with React based Next.js / Gatsby.js and Strapi Headless CMS [8]

Aug 2011 - Dec 2015

University of Mannheim // Mannheim, DE - Lappeenranta University of Technology // Lappeenranta, FIN

- Bachelor of Science in Business Informatics, Thesis: "The Relationship between Exploitative and Explorative Business Process IT"
- Deepening: "Artificial Intelligence", "Banking and IT Management"
- Term abroad Lappeenranta Univeristy of Technology, Finland (Jan 2014 May 2014)

HARD SKILLS

Programming Languages Libraries & Frameworks Tools & Platforms Data & Cloud Java / TypeScript **Spring Boot** Kubernetes / OpenShift MongoDB / SQL **JavaScript** Angular / React Docker / Terraform Kafka / Solace PubSub+ Python / Go RxJs Mayen / Jenkins AWS / Prometheus / Grafana HTML / CSS Mockito / JUnit Git / GitHub PyTorch / TensorFlow

SOFT SKILLS

Responsibility, Self-Discipline, Resilience, Team player, Strategic Thinking, Positive Mindset, Transparent Communication

INTERESTS

Music. Art. Al
