Senior Software Developer · 9+ years experience

SUMMARY

Senior Software Developer at Fincons Group AG, consultant on a project exclusively at SBB CFF FFS. 9+ years building production distributed systems (SAP Event Mesh, decisioning platforms, railway operations). Currently Interim Product Architect for the train information system (ZIS) across cargo and passenger flows in ART Analytics & DataHub, and Security Champion for ZIS. Stack: Java 25, TypeScript/Angular, Kafka, Kubernetes/OpenShift, ArgoCD. Speeds delivery with agentic engineering (GitHub Copilot) under human review.

SKILLS

LANGUAGES	Java 25, TypeScript, JavaScript, Python, Go, HTML/CSS
BACKEND & APIS	Spring Boot, REST, microservices, event-driven architecture
FRONTEND	Angular, React, RxJS
PLATFORM & CLOUD	Kubernetes, OpenShift, Docker, ArgoCD, Terraform, AWS, Jenkins, Maven, Git
DATA & MESSAGING	Kafka, MongoDB, SQL, RabbitMQ, Solace PubSub+
OBSERVABILITY	Prometheus, Grafana, Instana, Splunk
AI & AGENTIC	GitHub Copilot (professional) · Cursor, Claude Code (personal)
PRACTICES	SAFe, Scrum, secure SDLC, system architecture, TSI TEL compliance
DOMAINS	Cargo and passenger train information, railway operations, enterprise messaging

EXPERIENCE

Senior Software Developer
Oct 2022 - Present
Fincons Group AG
Bern, CH · Project exclusively at SBB CFF FFS

- Serve as **Interim Product Architect** on the SBB engagement (since May 2026) for ZIS, owning architecture decisions and TSI TEL compliance (EU rail telematics standard) for safety-relevant cargo and passenger information flows.
- Act as **Security Champion** (since July 2026) for those train information systems in ART Analytics & DataHub, embedding secure design and vulnerability hygiene into agile delivery.
- Develop software in a nationwide train-information system on Spring Boot and Kafka in production. Contributed to decommissioning a decades-old mainframe.
- Mentor new engineers and serve as a go-to engineer for complex debugging, implementation, and design questions.

Software Developer
Dec 2021 - Sep 2022
ACTICO GmbH
Immenstaad, DE

- Built Spring-based REST microservices hosting and executing rule-based / ML decision models in a Scrum team (Java, Python, Angular, TypeScript, Docker).

Software Developer
Oct 2016 - Dec 2020
SAP SE
Walldorf, DE

- Helped establish and extend SAP Event Mesh (Enterprise Messaging) with an international Scrum team.
- Delivered REST provisioning APIs for message brokers across >70% of SAP's global data centers, shipping releases and security patches.
- Led cross-broker message migration with an international partner for critical customer data and handled production outages for high-stakes messaging workloads.
- Implemented customer data metering foundations and built a Go statistics exporter feeding Prometheus/ Grafana with Slack alerting.

EDUCATION

B.Sc. Business Informatics
Aug 2011 - Dec 2015
University of Mannheim
Mannheim, DE · Exchange: LUT, Lappeenranta, FI

Thesis on exploitative vs. explorative business-process IT · Focus: AI, Banking & IT Management

Selected continuous learning: DeepLearning.AI / Coursera - Deep Learning (1, 2, 3, 4, 5, 6), Machine Learning (7) · Portfolio devsam.io (Next.js + Strapi)
